Styling HTML Elements

Basic Styling

The most basic styling properties include:

- **color**: Specifies the text color.
- **background-color**: Specifies the background color.
- **font-size**: Specifies the font size.
- **font-family**: Specifies the font family.

To apply these properties to an HTML element, simply select the element in the HTML editor and enter the desired values in the style editor.

Advanced Styling

In addition to basic styling, Markup Xp also allows you to apply more advanced styling properties to your HTML elements. These properties include:

- **text-align**: Specifies the text alignment.
- **padding**: Specifies the padding around the element.
- **margin**: Specifies the margin around the element.
- **border**: Specifies the border around the element.

These properties can be used to create more complex and visually appealing web pages.
