The Birth of Viro Two

Taylor's Viro Two series emerged from his ongoing exploration of geometric abstraction and the interplay of light and color. Inspired by the dynamic forms found in nature, he sought to create sculptures that would evoke a sense of movement and vitality.

The name "Viro" is derived from the Latin word for "man," reflecting Taylor's intention to create sculptures that embody human qualities, such as strength, balance, and resilience.

A Symphony of Colors and Forms

Viro Two sculptures are characterized by their vibrant color palettes and complex geometric forms. Taylor's use of color is both daring and harmonious, creating a visual spectacle that draws the eye and sparks the imagination.

The sculptures' forms evoke a sense of organic growth, as if they have emerged from the very earth itself. They defy traditional notions of symmetry and balance, yet they possess an inherent harmony that appeals to both the intellect and the senses.

Kinetic and Interactive Elements

Many Viro Two sculptures incorporate kinetic elements that allow them to move and interact with the environment. These elements range from motorized rotating parts to wind-activated chimes, adding an extra layer of dynamism to the works.

Taylor's sculptures are designed to engage viewers on multiple levels. They can be admired from afar, but they also invite closer inspection, revealing intricate details and unexpected perspectives.

Monumental and Site-Specific

Viro Two sculptures vary greatly in scale, from small tabletop pieces to monumental works that tower over their surroundings. Taylor's site-specific installations are carefully designed to complement the architecture and landscape of their environments.

Whether situated in a museum, gallery, or public space, Viro Two sculptures create a profound impact, transforming the space they inhabit

into immersive and thought-provoking experiences.

International Acclaim and Prestigious Commissions

Barnaby Taylor's Viro Two sculptures have garnered international acclaim and have been exhibited at renowned institutions around the world. His work has been featured in prestigious art fairs, such as Art Basel, and has been acquired by prominent collectors and museums.

Taylor's sculptures have also been commissioned for major public spaces, including the National Theatre in London and the Microsoft Campus in Redmond, Washington. These installations have become landmarks, enhancing the urban environment and providing inspiration to countless passersby.

The Artistic Philosophy of Barnaby Taylor

At the heart of Barnaby Taylor's artistic philosophy is a deep reverence for nature and a belief in the power of art to connect people and communities.

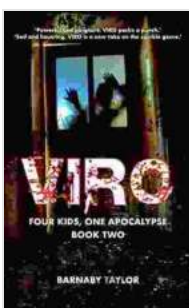

His Viro Two sculptures are not merely aesthetic objects; they are invitations to explore the interconnectedness of all living things and to reflect on our place in the universe.

"My sculptures are a way of expressing the beauty and diversity of the natural world," says Taylor. "I hope that they inspire viewers to think more deeply about their relationship with the environment and to appreciate the fragility and interconnectedness of life."

Barnaby Taylor's Viro Two sculptures are a testament to the boundless creativity and artistic vision of one of the most innovative contemporary

artists of our time. Their vibrant colors, dynamic forms, and kinetic elements create a captivating sensory experience that transcends the boundaries of traditional art appreciation.

As we continue to grapple with the challenges of a rapidly changing world, Taylor's sculptures offer a reminder of the beauty and interconnectedness of nature, inspiring us to reconnect with our surroundings and to strive for a more harmonious and sustainable future.
